CALL FOR CAPSTONE

MARCH 7TH, 2025 | 4:00 PM – 8:00 PM

HUMBER POLYTECHNIC – NORTH CAMPUS LEARNING RESOURCE COMMONS

CYBERCREW

Harshal Modi

SQL/MySQL
Python/ML/DA
MongoDB/PostgreSQL/JS
React/Angular/Node.js

Rachit Kamboj

React.js
Node.js
SQL/MySQL
PostgreSQL/MongoDB

Safalpreet Singh

Java, C/C++
PHP/JS
Oracle SQL/MySQL
React/Angular

About Us

We are a team of passionate developers, data analysts, and engineers dedicated to delivering cutting-edge solutions using the latest technologies. With expertise in databases, machine learning, full-stack development, and data visualization, we create scalable and efficient applications that drive business success. Our commitment to innovation and quality ensures that we provide robust, high-performance solutions tailored to your needs.

Why Choose Us

- **Expertise in Full-Stack Development –** We specialize in modern web technologies, including React.js, Angular, Node.js, PHP, and Java, to build high-performance, scalable applications.

- **Advanced Database & Backend Solutions –** With extensive experience in SQL, MySQL, PostgreSQL, MongoDB, and Oracle SQL, we design efficient, secure, and scalable database architectures. Our backend solutions ensure smooth data handling, high availability, and performance optimization for mission-critical applications.

- **Machine Learning –** We harness the power of Python, Machine Learning, and AI to provide intelligent automation, predictive analytics, and data-driven decision-making.

- **Data Visualization & Business Intelligence –** We transform complex data into meaningful insights using advanced visualization tools. From interactive dashboards in Power BI to custom-built visualization frameworks, we help businesses understand trends, optimize strategies, and make data-backed decisions with clarity and precision.
